## Fully Baffled Poly Cartage Tanks

Rota Moulding are pleased to advise the availability of a fully baffle poly cartage tank.

Due to the process of rotational moulding conventional baffles in rota moulding tanks have been unavailable.

Recently an Australian company released a light weight ball system to completely baffle tanks.

Rota Moulding recently tested the baffle ball system in their cartage tank range with remarkable results

Features of the baffle ball:

- Total 360 degree baffle
- Reduces Fluid movement for improved load stability during transit
- Food grade material – suitable for drinking water
- No Rust , lightweight & durable
- Low liquid displacement
- Recommend using 1 ball per 40 litres of tank capacity
- Each ball displaces 428 millilitres and weighs only 386g
- Fits in all Rota tanks 800lt and above
- Small ball will be available soon for the 500lt and compact fire range
